

Morpheus 8

Radiant and beautiful face and body contours

What is Morpheus 8?

Morpheus 8 is a revolutionary new device that tightens the skin and remodels fat to lift, smooth and contour the face and body.

Morpheus 8 is a subdermal adipose remodelling device (SARD). It is a minimally-invasive treatment that combines micro-needling with radiofrequency technology. Morpheus 8 penetrates deep into the skin to mould and sculpt the fat and tighten the skin to create a smoother, firmer and more youthful appearance.

Morpheus 8 is a highly-adaptable fractional device. The aesthetic doctors at Bella Vou can programme the penetration depth and energy delivery to tailor the treatment for your needs. Morpheus 8 effectively treats fine lines and wrinkles, acne scars, skin laxity, and improves your skin tone and texture.

Why have Morpheus 8?

Age, weight loss and sun damage can take their toll on the appearance, leaving the skin lax and droopy and the texture uneven.

If you're concerned about the signs of ageing, but you want to avoid invasive surgery, Morpheus 8 is an innovative, minimally-invasive alternative. The aesthetic doctors use Morpheus 8 to treat fine lines and wrinkles, tighten loose skin on the cheeks or jowls, treat acne scarring and even up skin tone.

What happens in Morpheus 8?

The specialists at `Bella Vou perform Morpheus 8 under topical, local anaesthetic or sedation depending on the size of the area being treated.

The expert aesthetic doctor treats the targeted area using the Morpheus 8 device. The head has 24 coated pins which penetrate the subdermal tissue. The microneedles make small punctures in the skin, which trigger a wound healing response to repair the skin cells. As a result, there is increased production of the skin's vital collagen and elastin. Also, the device precisely releases radiofrequency energy to coagulate fat and heat the tissues making them contract so that the overlying skin tightens.

A programme of 1-3 treatments at 4-6 week intervals with Morpheus 8 can smooth, sculpt and rejuvenate your appearance.

How long is the recovery following Morpheus 8?

Your recovery from Morpheus 8 will depend on the area treated and your general health and wellbeing. Bella Vou will provide a bespoke plan of aftercare and rehabilitation to support your recovery.

There is minimal downtime following treatment. You may notice some redness and pinprick bruising following treatment. Try to avoid touching your face and applying make-up for 24 hours to prevent infection.

Quick glance guide to Morpheus 8 treatment

Bella Vou combines cutting-edge treatment and clinical excellence with the luxury, comfort and discretion of a spa and the hospitality of a five-star hotel.

Your Morpheus 8 journey at Bella Vou

Free, no-obligation consultation

Bella Vou offers every client a free consultation with an expert aesthetic doctor or an accredited cosmetic surgeon with no obligation to proceed to treatment. The consultation is an opportunity to discuss any concerns you have, the results you want to achieve, and whether Morpheus 8 can help you reach those goals.

Bella Vou will always give you an honest and impartial professional opinion. Mr Amir Nakhdjevani says:

'We make sure that we advise people correctly about whether surgery is right for them. We treat everyone as if they were our family. We might turn people away, suggest alternative treatments, or we may suggest that they go to a different specialist at another establishment. Bella Vou, never pressurise people or try to sell procedures. It's about giving an honest opinion and honest advice.'

Preparation for Morpheus 8

Preparation for your procedure can help improve your recovery and protect against complications. You may be asked to stop taking medicines, including aspirin and ibuprofen, to reduce the risk of bruising and bleeding. It's essential to stop smoking cigarettes and e-cigarettes around the procedure, as smoking can impede the healing process.

On the day of your operation, you'll be personally welcomed to Bella Vou, given a gown to wear and escorted to the state-of-the-art operating theatre.

What happens during Morpheus 8

Your doctor or surgeon will perform Morpheus 8 under topical or local anaesthetic, sometimes with sedation depending on the size of the area being treated, and your personal preferences. They will wait to ensure you are comfortable, and the anaesthetic is effective before starting the procedure.

After cleansing the skin, your doctor will pass the Morpheus 8 applicator over the treatment areas. The applicator has 24 coated pins that penetrate the tissue below the dermis. The targeted radiofrequency energy gently heats the area, tightens the skin and stimulates collagen production, resulting in a smoother contour that looks natural and even. The specialist will perform 1-3 passes of the device depending on your skin sensitivity, pigmentation and the problem being treated.

The Morpheus 8 can be used as a standalone treatment or combined with a facelift, eyelift, FaceTite therapy, dermal filler or anti-ageing injections for a comprehensive rejuvenation programme.

Recovery from Morpheus 8

After the procedure, most people can go home and get on with normal activities. However, the staff at Bella Vou are always on hand to offer you a drink or a snack and answer any questions.

The pinpricks may be red, and the skin may be a little sore and irritated for a few days after treatment. Your skin may also be more sensitive, so careful sun-protection is essential. The Bella Vou team may give you antibiotic cream to

prevent infection; you should also avoid touching your face and applying make-up for 24 hours.

FAQs

How soon before I see the results?

The results will vary depending upon the individual being treated. Many patients report that they begin to see results immediately after treatment, and then continue to improve over the following weeks as the elastin and collagen production is stimulated. Improvements continue for up to three months, and for many people, a course of treatment provides optimal results.

Is Morpheus 8 the same as micro-needling?

Morpheus 8 is an innovative treatment that combines the benefits of micro-needling with radiofrequency technology. As well as the 24 micro-needles stimulating a healing response and increasing elastin and collagen production, the radiofrequency energy heats the tissues under the skin. At the same time, the energy tightens the connective fibres and remodels fat to lift and firm the contours and revitalise your appearance.
