

Nose Reshaping

Non-surgical treatment to reshape and improve the contour of the nose

What is Nose Reshaping?

Nose Reshaping is also known as a non-surgical nose job. It is an innovative way of injecting fillers into the nose to even out lumps and bumps, smoothing the contour so that the nose appears smaller, more symmetrical, and more in proportion with your facial features.

Why have Nose Reshaping?

For people who are self-conscious about the shape of their nose, a Rhinoplasty is not the only option. A non-surgical nose job can transform the contour of the nose, evening out bumps, and paradoxically making the nose look smaller, even though filler has been injected.

Many people don't want the expense, pain, and downtime of surgery. Nose correction with hyaluronic acid fillers can be an excellent, temporary, alternative. Nose Reshaping is particularly effective for people with a pronounced bump on the bridge of the nose, a droopy tip, or a slightly crooked nose. Very large, misshapen, or wide noses are more likely to need surgical Rhinoplasty to achieve satisfactory cosmetic results.

What happens in Nose Reshaping?

Nose correction is performed as an outpatient procedure with topical anaesthesia. Bella Vou offers a range of hyaluronic acid fillers to reshape the nose. The specialists use Juvederm by Allergan, which is the market leader. There are various options, depending on what result you are looking to achieve.

The specialist injects the filler through a fine needle. Treatment to the bridge of the nose can even out bumps, filler at the tip can make the nose look thinner, and filler at the end can lift a droopy tip.

How long is recovery from Nose Reshaping?

There is minimal downtime following Nose Correction. You will be able to get on with your usual activities following the procedure; however, mild redness, small lumps, and a little bruising are normal for a few days after treatment. The team will advise on follow-up care and recommend concealer to camouflage any problems.

Quick glance guide to Nose Reshaping

Procedure Time: Around 20 minutes (plus half an hour for the numbing cream to become effective)

Recovery: There is no downtime following the procedure

Anaesthetic: Topical anaesthetic cream

Hospital stay: No

Treats: Lumpy, uneven or unsightly nose

Why choose Bella Vou for Nose Reshaping?

Bella Vou offers clients a uniquely individual approach to cosmetic surgery and aesthetic treatments. The state-of-the-art clinic provides the very latest procedures in a chic, comfortable, and welcoming environment in the heart of the beautiful historic town of Royal Tunbridge Wells.

Bella Vou is dedicated to providing satisfaction, the highest standards of care, and a personal touch, throughout your treatment journey. The skilled team is passionate about helping people achieve the results they want and making their experience enjoyable and stress-free.

Bella Vou offers competitively priced packages of care, with no hidden extras. The clinic is approved and inspected regularly to ensure the highest standards of patient care and assured with exacting standards on cleanliness and infection control safeguards. The staff at Bella Vou are professional, highly qualified, and led by cosmetic surgeons recognised by the most reputable aesthetics and cosmetic surgery associations, including the UK Association of Aesthetic Plastic Surgeons (UKAAPS).

Bella Vou combines cutting-edge treatment and clinical excellence with the luxury, comfort, and discretion of a spa and the hospitality of a five-star hotel.

Your Nose Reshaping journey at Bella Vou

Free, no-obligation consultation

Bella Vou offers every client a free consultation with an expert. The consultation is an opportunity to discuss any concerns you have, the results you want to achieve, and whether Nose Reshaping can help you reach those goals.

Bella Vou will always give you an honest and impartial professional opinion. Mr Amir Nakhdjevani says:

‘At Bella Vou, we never pressurise people or try to sell procedures. It's always about giving an honest opinion and honest advice.’

Preparation for Nose Reshaping

You may be asked to stop taking some medicines such as aspirin and ibuprofen to reduce the risk of bruising and bleeding during the procedure. If you have any concerns, the staff at Bella Vou will always be on hand to answer your questions and offer support.

What happens during Nose Reshaping?

Nose Reshaping is carried out as an outpatient procedure. Half an hour before treatment, the staff at Bella Vou will apply a numbing cream on your nose. This lessens the sensation of the needle and helps maintain your comfort.

The specialist will inject the hyaluronic acid filler through a fine needle to reshape the nose. The treatment will be targeted to your nose, and the results you want to achieve. Injection to the bridge of the nose can even out bumps, filler at the tip can make the nose look thinner, and filler at the end can lift a droopy tip.

There is no need for dressings or bandages following treatment.

How long is recovery from Nose Reshaping?

There is minimal downtime following Nose Correction. Most people can go back to work and get on with your usual activities. However, mild redness, small lumps, and a little bruising are normal for a few days after treatment.

The team at Bella Vou is always on hand after your treatment. They'll offer you a drink or a snack, answer any questions, advise on follow-up care, and recommend concealer to camouflage any problems.

FAQs

Is Nose Reshaping painful?

The team at Bella Vou is dedicated to ensuring your comfort during treatment. They will apply a topical anaesthetic before the procedure to numb the skin and reduce pain.

The needle is very fine, so discomfort should be transient. The tip of the nose is usually the most sensitive area.

How long does the effect last?

The time the filler lasts varies between individuals. Also, differing formulations can have different effects. Many nose fillers last between 18 months to three years. Your specialist will take you through the options and make recommendations.

Can I wear make-up after Nose Reshaping?

On the day of treatment, you should not have make-up on the area to be treated. You can use make-up again, as usual, the day after your filler treatment.

Can Nose Reshaping be reversed?

If you don't like the look of your nose after the hyaluronic acid has been injected, the treatment can be reversed by injecting an enzyme which dissolves most types of filler.
