

Vaginal Dryness Treatment

Cutting-edge CO2RE Intima treatment to improve vaginal lubrication, restore vaginal health, and improve sexual function.

What is CO2RE Intima Vaginal Dryness Treatment?

CO2RE Intima is an innovative non-surgical laser therapy that reduces vaginal dryness, rejuvenates vaginal tissue, and treats sexual pain and discomfort.

Targeted laser energy triggers a healing response in the vaginal tissues. It promotes collagen growth, stimulates new elastin formation, and results in remodeling of the soft tissue fibres to increase natural lubrication and improve the texture, tone, and appearance of the vagina.

CO2RE Intima is a quick, painless, and effective treatment for vaginal dryness. It increases hydration and improves sexual function without the need for surgery or hormonal medication.

Why have CO2RE Intima therapy?

Vaginal dryness is a common problem for women. It can cause discomfort, make sex painful, and increase the risk of urinary infections.

Insufficient lubrication is often triggered by falling hormone levels after the menopause, after childbirth or during breast-feeding. Oestrogen is the female hormone that keeps the vaginal lining thick, moist, and elastic. When levels drop, the walls of the vagina can become thin, dry, and less flexible.

Lack of vaginal moisture can cause pain, tension, and bleeding during intercourse, which can be distressing and inhibit sexual pleasure. If you are developing hormonal changes related to the menopause, experiencing pain during intercourse, or struggling with a sore, dry, or itchy vagina CO2RE Intima can increase lubrication, rejuvenate the vagina and help you relax and enjoy sex again.

What happens in CO2RE Intima treatment?

CO2RE Intima treatment is carried out as an outpatient procedure. It takes place in Bella Vou's comfortable and discreet laser treatment suite.

The procedure is a little like a smear test. The doctor will insert a narrow laser device into the vagina. The probe will target CO2 energy to the vaginal wall. The energy creates tiny wounds that encourage the body's natural healing process to restore and rejuvenate the vagina.

How long is recovery from CO2RE Intima treatment?

There's no downtime following CO2RE Intima Vaginal Dryness Treatment. The Bella Vou staff will offer you a hot drink and a snack if you need a little time to recover, but most women can get straight back to their usual activities following the procedure.

You should avoid sex and using tampons for a week after treatment to allow the delicate tissues to heal. Most women notice an improvement after just one session. However, a programme of three treatments is recommended for maximum benefit.

Quick glance guide to CO2RE Intima treatment

Procedure Time: 10-15 minutes

Back to Work: No downtime

Anaesthetic: No anaesthetic needed

Your CO2RE Intima treatment journey at Bella Vou

Free, no-obligation consultation

Bella Vou offers every client a free consultation with an expert. The consultation is an opportunity to discuss any concerns you have, the results you want to achieve,

and get an impartial opinion on whether CO2RE Intima treatment can help you reach those goals.

Bella Vou will always give you objective professional guidance. Leading aesthetic surgeon Mr Amir Nakhdjevani says:

'At Bella Vou, we never pressurise people or try to sell procedures. It's always about giving an honest opinion and honest advice.'

Preparation for CO2RE Intima treatment

Before treatment, you should have had an up-to-date smear test. You shouldn't be menstruating at the time of your treatment.

You may be asked to stop taking some medicines such as aspirin and ibuprofen to reduce the risk of bruising and bleeding. If you have any concerns, the staff at Bella Vou will always be on hand to answer your questions and offer support.

What happens during CO2RE Intima treatment?

Your CO2RE Intima treatment will be performed in Bella Vou's state-of-the-art laser treatment suite.

The procedure is a little like a smear test. The expert therapist will insert the sterile laser device into the vagina. The probe targets controlled CO2 energy at the vaginal wall. The energy creates tiny wounds that encourage the body's natural healing process to restore and rejuvenate the vagina.

The probe is slowly rotated and withdrawn, one centimetre at a time until the entire vaginal area is treated. The treatment takes around ten to fifteen minutes.

Recovery from CO2RE Intima treatment

There's little downtime following CO2RE Intima Vaginal Dryness Treatment. Most women can get straight back to their usual activities following the procedure. However, the staff at Bella Vou will be on hand to offer refreshments, support, and guidance on after-care.

It's important to avoid sex and using tampons for seven days after treatment. This allows the delicate tissues to heal and reduces the risk of infection.

Most women notice an improvement after just one session. However, a programme of three to five treatments may be recommended for maximum benefit.

FAQs

Is CO2RE Intima treatment safe?

Intima treatment is simple, safe, and non-surgical. Most women experience no more than mild discomfort and can continue with normal activities after the procedure.

How much downtime will I need?

Most women can return to normal activities straight after the procedure. However, after internal vaginal rejuvenation, it's important not to insert tampons and to refrain from sex for a week.

When will I start to see results?

The response to treatment can be very individual. However, most women notice an improvement after the first treatment. Maximum benefit is achieved after a series of three to five treatments.

Does it CO2RE Intima hurt?

Treatment is usually quick, easy, and pain-free. There is no need for any anaesthetic. Most women experience no more than mild discomfort.

What effects does the CO2RE Intima have on the genitals?

The targeted energy triggers a healing response in the genital tissues. It promotes collagen growth, stimulates new elastin formation, and improves the texture, tone, and appearance of the vagina and vulva.

As well as increasing lubrication, the CO2RE Intima treats vaginal atrophy, restores vaginal strength, shape, and flexibility, treats urinary incontinence, and enhances sexual function to rejuvenate the area comprehensively.
